

Balaji Furnitures – Website Animations

Name of each animation, what it does and where it is used (with screenshot). Source: public/css/style.css and public/js/main.js. No external animation library is used – everything is plain CSS and a little JavaScript.

Summary

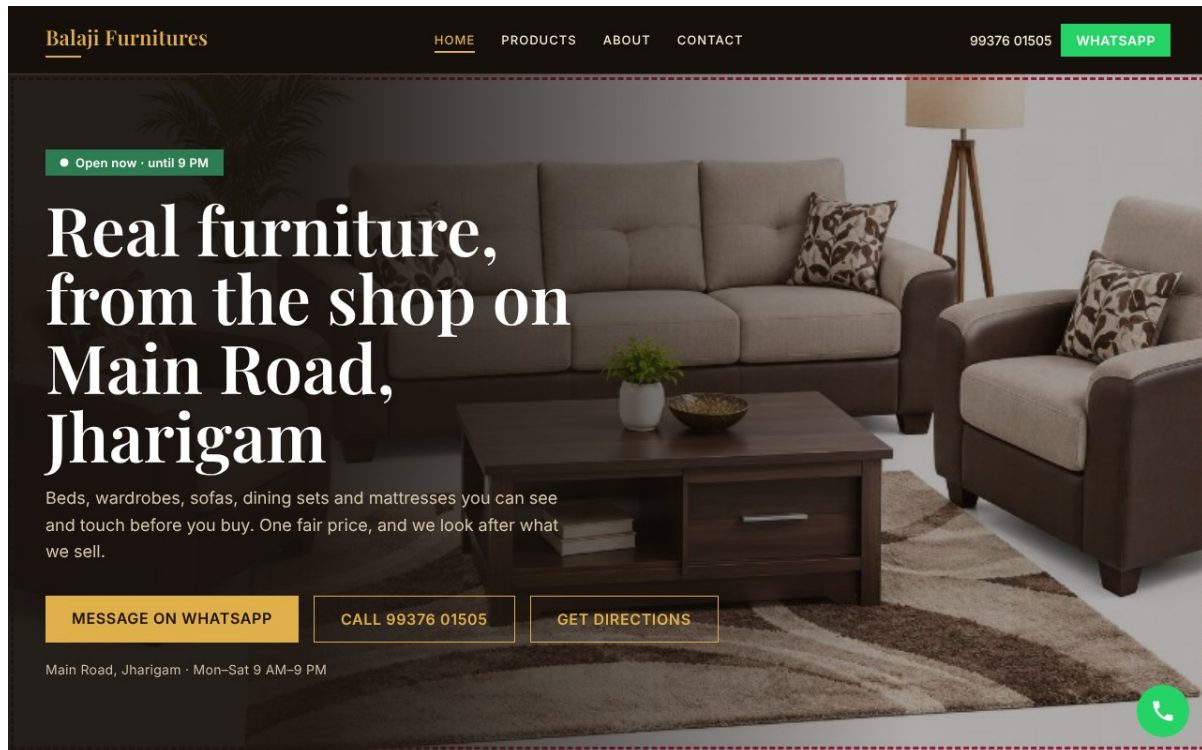

#	Animation	Where it is used
1	Hero Wipe-Up + Staggered Fade-Up	Home page (index.html) – top hero banner
2	Pulsing "Open Now" Dot	Green "Open now – until 9 PM" badge on the hero (also on Contact page)
3	Scroll Reveal (Fade-Up / Scale-In)	Almost every section on every page – category grid, featured pieces, offers, FAQ, owner photo, footer
4	Gold Line Wipe (Rule Draw-In)	Small gold divider lines under section headings (e.g
5	Service Card Top-Line Wipe	"Service & warranty" cards on the Home page
6	Card Lift, Tilt & Image Zoom on Hover	Featured piece cards: lift 6 px, tilt slightly, soft shadow; photo zooms 6 %
7	Category Card Hover Lift	"Shop by category" tiles: lift, shadow, slow photo zoom and the name slides up
8	Opening Hours Row Slide + Dot	"Visit us" opening-hours table
9	Smooth FAQ Accordion	"Frequently asked questions" on Home and Contact pages
10	Footer Link Slide	Footer link lists – a hovered link slides right 8 px and turns gold
11	Shrinking Sticky Header + Sliding Nav Underline	Top header on every page
12	Floating Call Button Ripple + Back-to-Top	Green round call button (bottom-right, every page) rises in after load and sends out a soft ring every few seconds
13	Button Hover Lift	All gold / ghost / WhatsApp buttons (hero buttons shown) lift slightly with a shadow on hover and press down on click
14	Form Shake Error	Enquiry form (Contact page, Home page bottom)
15	Mobile Bottom Bar Slide-Up + Ripple	Phone view: CALL / WHATSAPP / DIRECTIONS bar slides up from the bottom; the WhatsApp tab pulses with a green ring
16	Hamburger → Cross Morph + Mobile Menu Drop	Phone view menu button

1. Hero Wipe-Up + Staggered Fade-Up

Technique: CSS @keyframes: wipe-up, fade-up

Where used / what you see: Home page (index.html) – top hero banner. On page load the sofa photo is revealed bottom-to-top (clip-path), then the badge, heading, text, buttons and address fade up one after another.

Code location: style.css lines 481, 483, 497-503

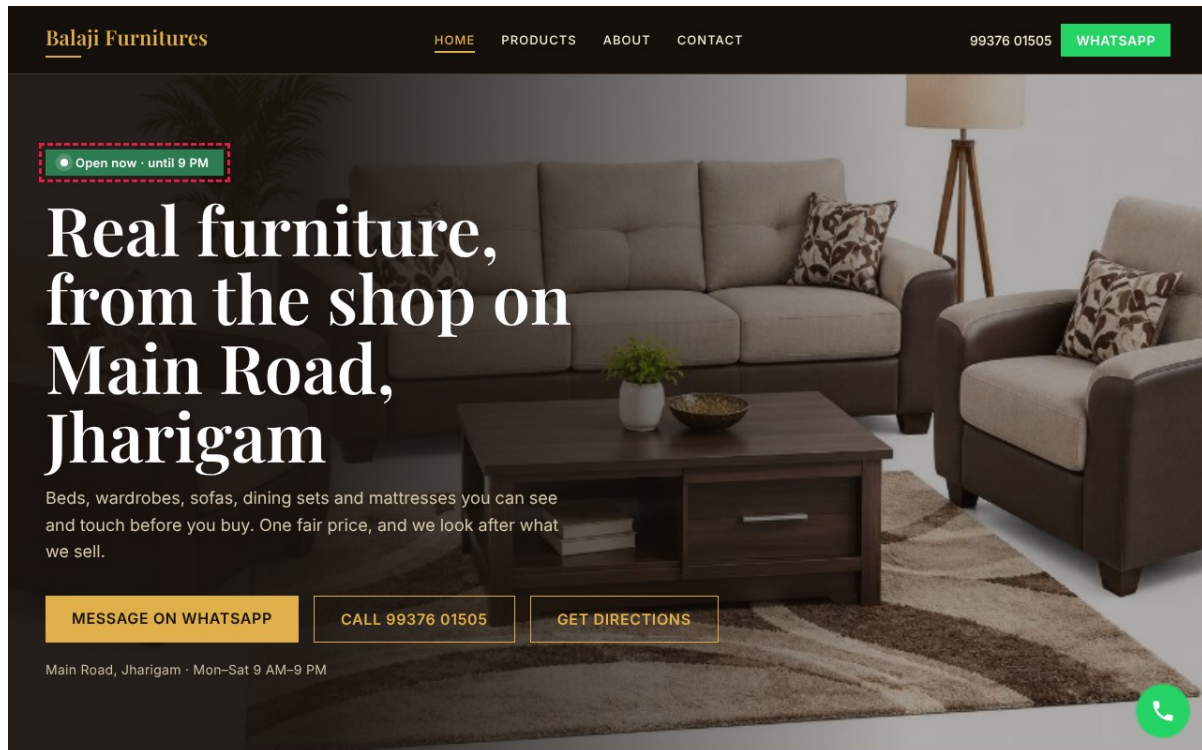

Red dashed box marks the animated element.

2. Pulsing "Open Now" Dot

Technique: CSS @keyframes: ping

Where used / what you see: Green "Open now - until 9 PM" badge on the hero (also on Contact page). A ring keeps spreading out and fading around the dot; it stops when the shop is closed. The badge itself is updated by main.js every minute.

Code location: style.css lines 485, 506-508; main.js line 88

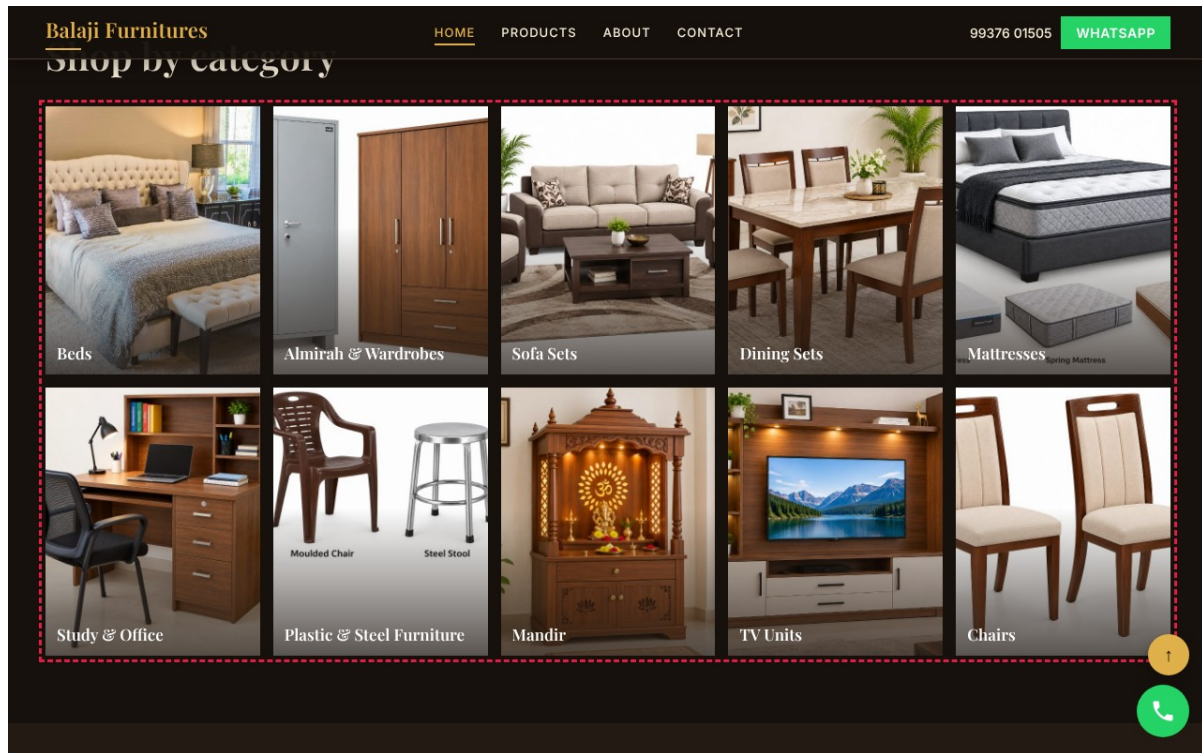

Red dashed box marks the animated element.

3. Scroll Reveal (Fade-Up / Scale-In)

Technique: IntersectionObserver in main.js + @keyframes fade-up, scale-in

Where used / what you see: Almost every section on every page – category grid, featured pieces, offers, FAQ, owner photo, footer. Items glide up and fade in as you scroll to them, with a small stagger between neighbours (0.08 s each).

Code location: main.js lines 129-181; style.css lines 481-482, 511-514

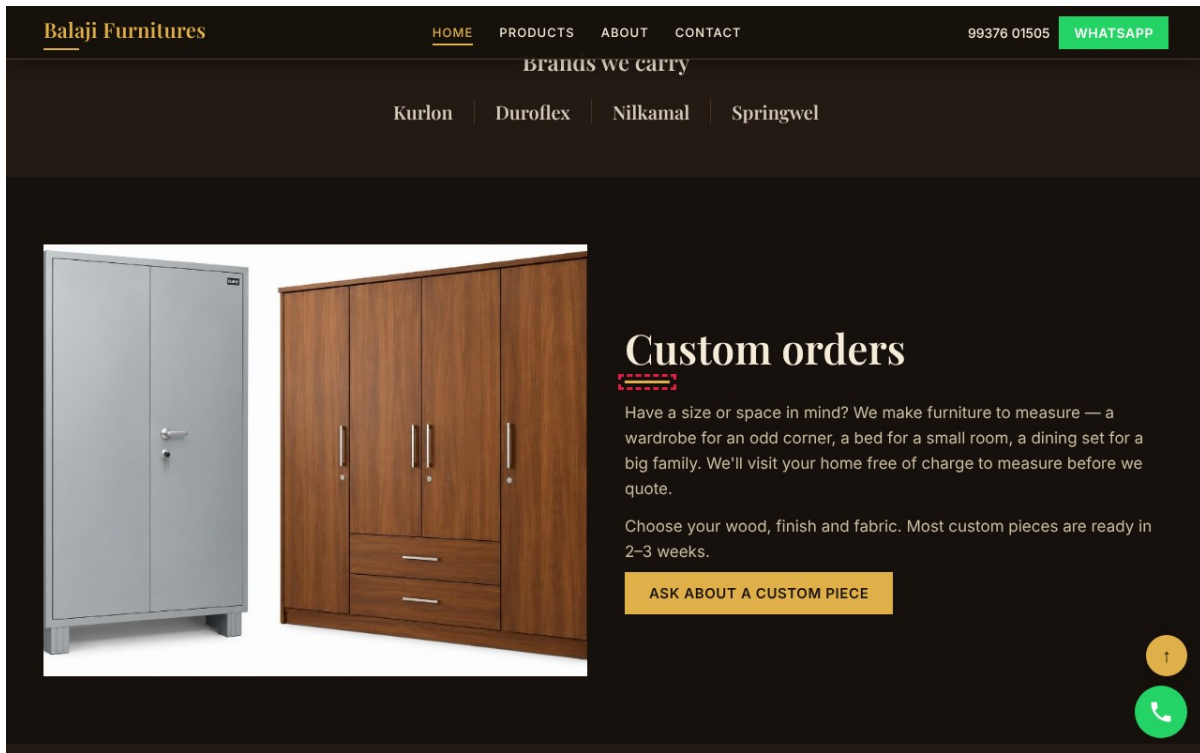

Red dashed box marks the animated element.

4. Gold Line Wipe (Rule Draw-In)

Technique: CSS @keyframes: line-wipe

Where used / what you see: Small gold divider lines under section headings (e.g. "Custom orders") and the gold top border of each "Service & warranty" card draw in from left to right.

Code location: style.css lines 484, 516-522

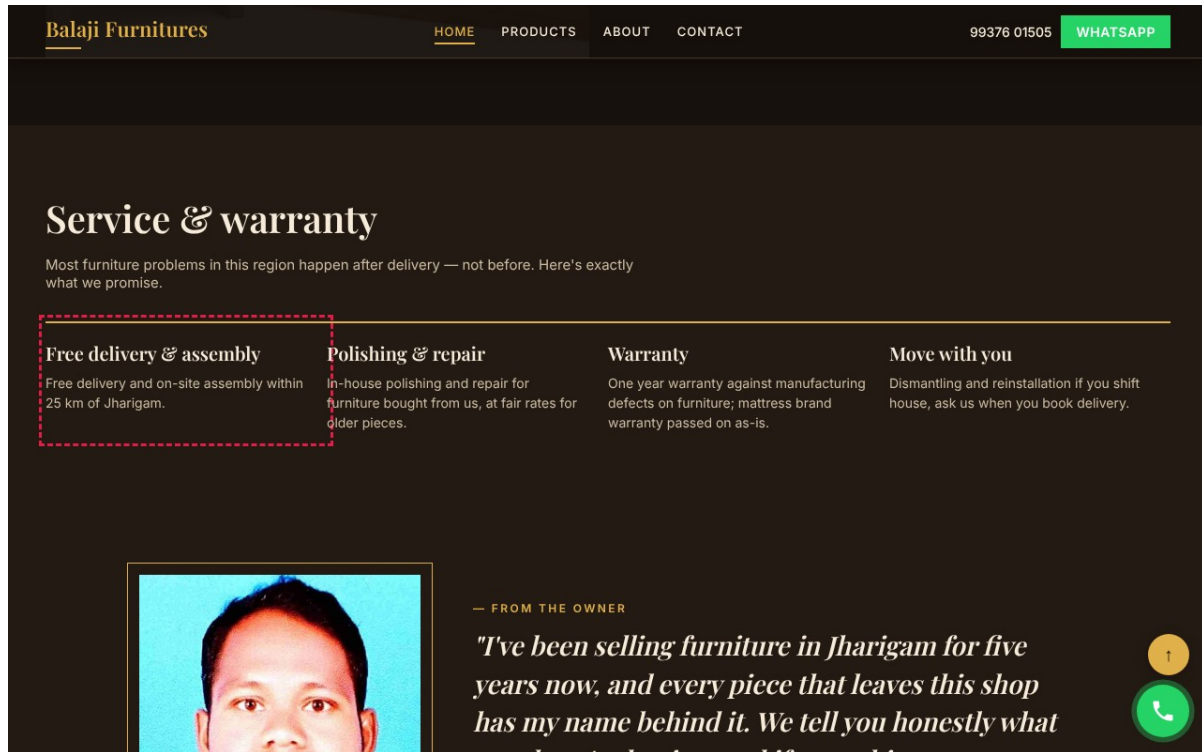

Red dashed box marks the animated element.

5. Service Card Top-Line Wipe

Technique: CSS @keyframes: line-wipe (::before)

Where used / what you see: "Service & warranty" cards on the Home page.

Code location: style.css lines 520-523

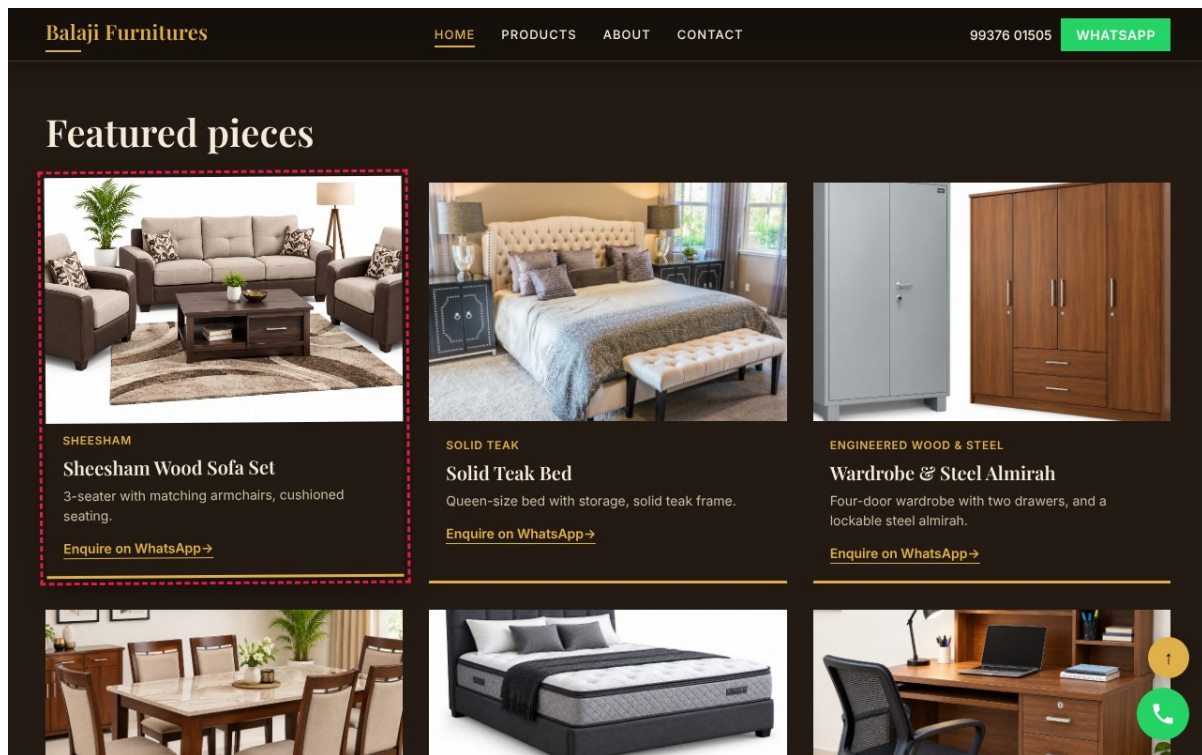

Red dashed box marks the animated element.

6. Card Lift, Tilt & Image Zoom on Hover

Technique: CSS transition + transform

Where used / what you see: Featured piece cards: lift 6 px, tilt slightly, soft shadow; photo zooms 6 %. Only on devices with a mouse.

Code location: style.css lines 555-564

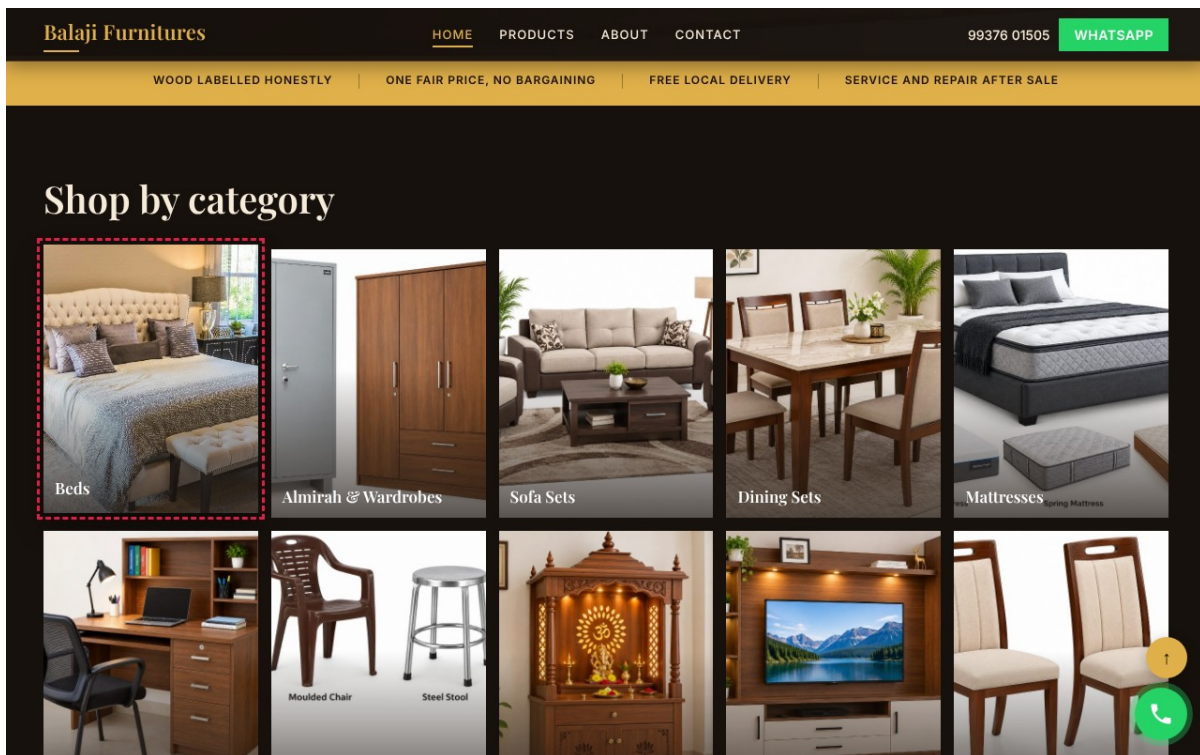

Red dashed box marks the animated element.

7. Category Card Hover Lift

Technique: CSS transition + transform

Where used / what you see: "Shop by category" tiles: lift, shadow, slow photo zoom and the name slides up.

Code location: style.css lines 556-564

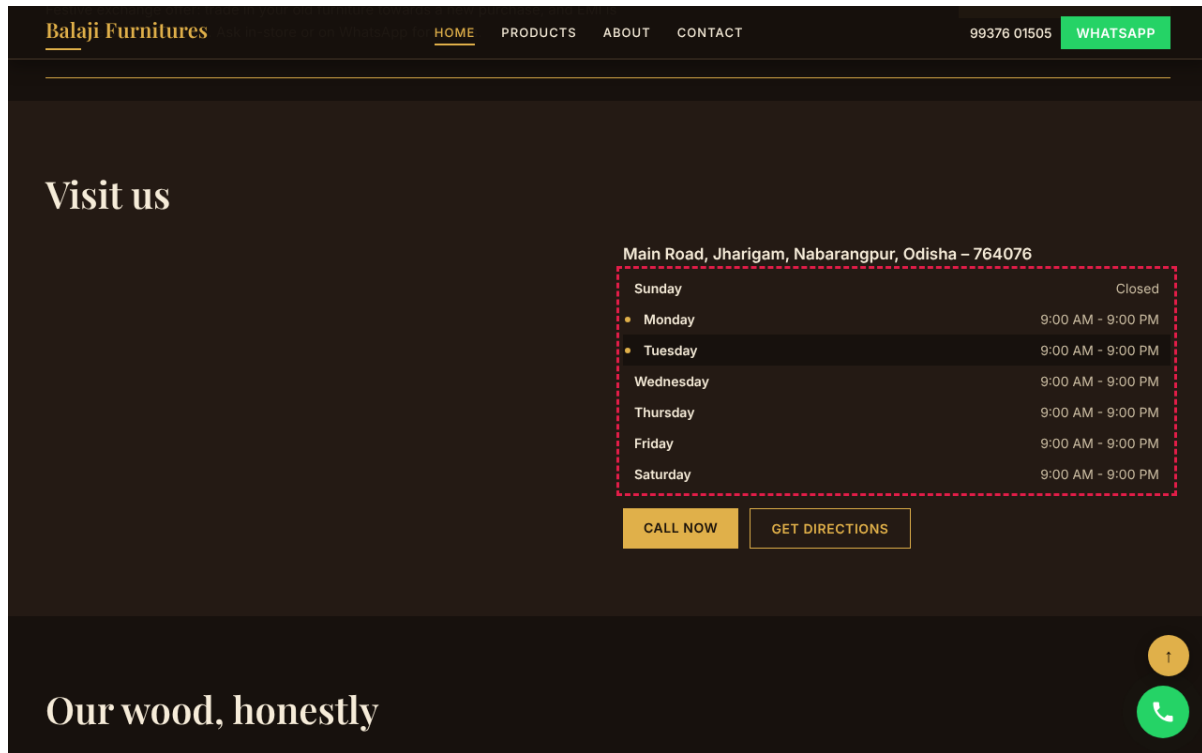

Red dashed box marks the animated element.

8. Opening Hours Row Slide + Dot

Technique: CSS transition

Where used / what you see: "Visit us" opening-hours table. Hovered row (and today's row) slides right and a gold dot pops in.

Code location: style.css lines 568-574

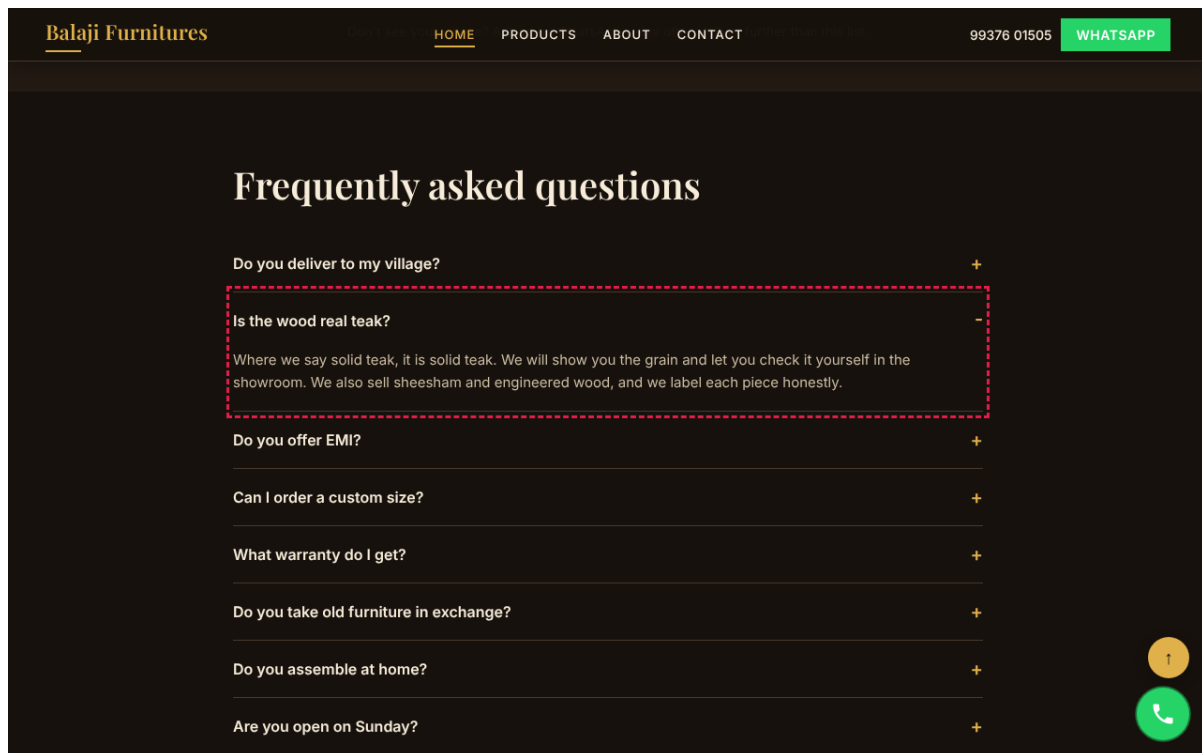

Red dashed box marks the animated element.

9. Smooth FAQ Accordion

Technique: CSS grid-template-rows transition

Where used / what you see: "Frequently asked questions" on Home and Contact pages. Answer opens/closes smoothly by height and the + / arrow sign rotates.

Code location: style.css lines 605-612; main.js line 282 onward

Red dashed box marks the animated element.

10. Footer Link Slide

Technique: CSS transition

Where used / what you see: Footer link lists – a hovered link slides right 8 px and turns gold.

Code location: style.css lines 575-576

Red dashed box marks the animated element.

11. Shrinking Sticky Header + Sliding Nav Underline

Technique: CSS transition + scroll listener (main.js)

Where used / what you see: Top header on every page. After 40 px of scroll it shrinks to 56 px and gains a shadow; nav links show a gold underline that slides in on hover.

Code location: main.js lines 123-130; style.css lines 526-535

Red dashed box marks the animated element.

12. Floating Call Button Ripple + Back-to-Top

Technique: CSS @keyframes: rise-in, ripple

Where used / what you see: Green round call button (bottom-right, every page) rises in after load and sends out a soft ring every few seconds. The gold ↑ button rises in after scrolling 400 px; click scrolls smoothly to top.

Code location: style.css lines 486-487, 635-640; main.js lines 335-342

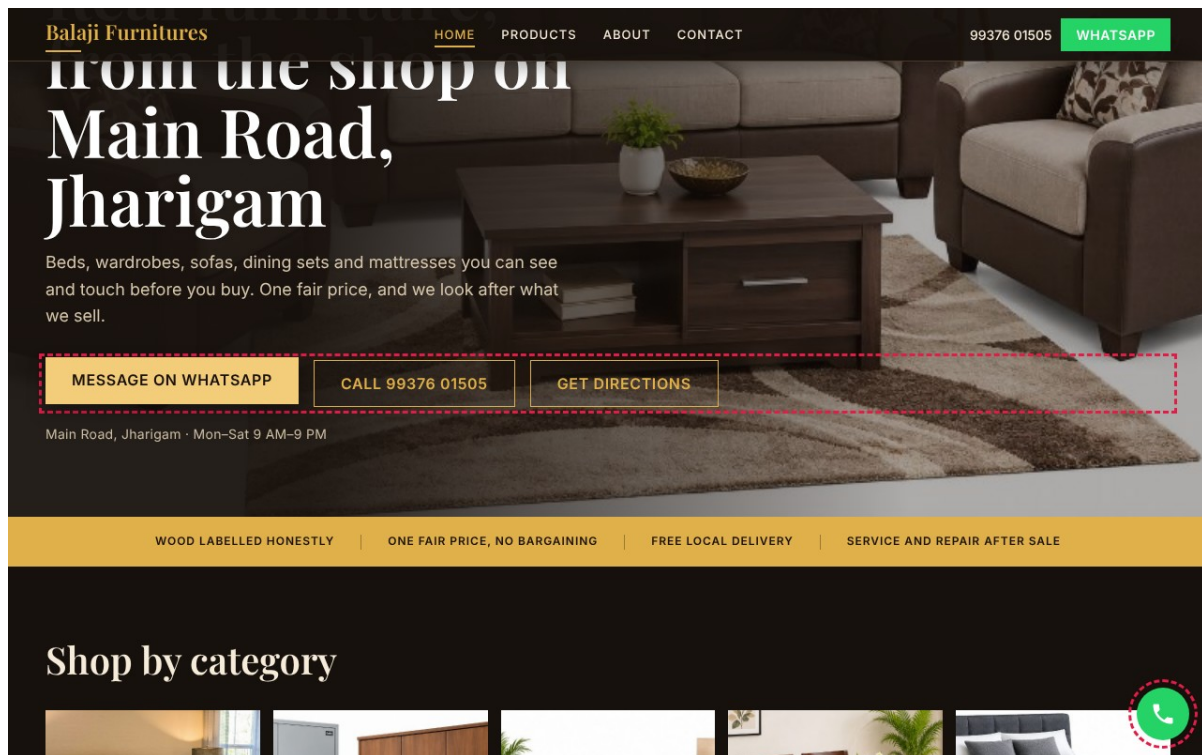

Red dashed box marks the animated element.

13. Button Hover Lift

Technique: CSS transition

Where used / what you see: All gold / ghost / WhatsApp buttons (hero buttons shown) lift slightly with a shadow on hover and press down on click.

Code location: style.css lines 538-552

Red dashed box marks the animated element.

14. Form Shake Error

Technique: CSS @keyframes: shake, slide-in

Where used / what you see: Enquiry form (Contact page, Home page bottom). Entering a wrong phone number shakes the field with a red border and slides the error message in. The Send button shows a spinner while sending and a drawn tick when sent (@keyframes spin, draw).

Code location: style.css lines 491-494, 616-631; main.js lines 395-402

The screenshot shows the 'Send an enquiry' form on the Balaji Furnitures website. The form is set against a dark background. It includes fields for Name, Phone, Category, and Message. The Phone field contains '123' and is highlighted with a red dashed border, indicating a validation error. Below the Phone field, a red error message reads: 'Enter a valid 10-digit Indian mobile number.' The Category dropdown is set to 'Beds'. The Message field has the placeholder text 'Tell us what you're looking for'. At the bottom of the form is a yellow button labeled 'SEND VIA WHATSAPP'. To the right of the form are two circular buttons: a yellow one with an upward arrow and a green one with a white telephone handset icon. The website's header at the top includes the logo 'Balaji Furnitures', navigation links (HOME, PRODUCTS, ABOUT, CONTACT), a phone number '99376 01505', and a green 'WHATSAPP' button. Below the header are two yellow buttons: 'CALL NOW' and 'GET DIRECTIONS'.

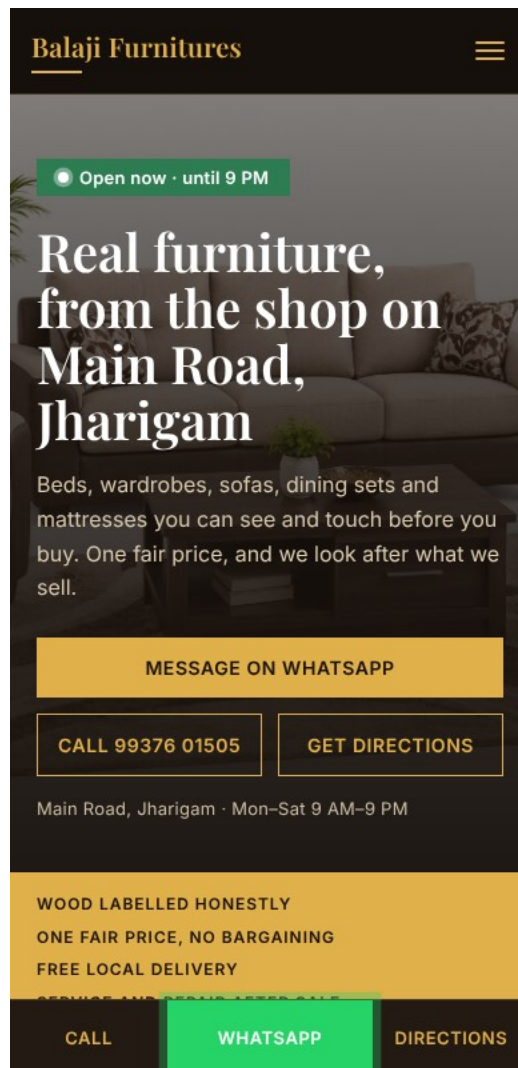

Red dashed box marks the animated element.

15. Mobile Bottom Bar Slide-Up + Ripple

Technique: CSS @keyframes: bar-rise, ripple

Where used / what you see: Phone view: CALL / WHATSAPP / DIRECTIONS bar slides up from the bottom; the WhatsApp tab pulses with a green ring.

Code location: style.css lines 486, 488, 641-642

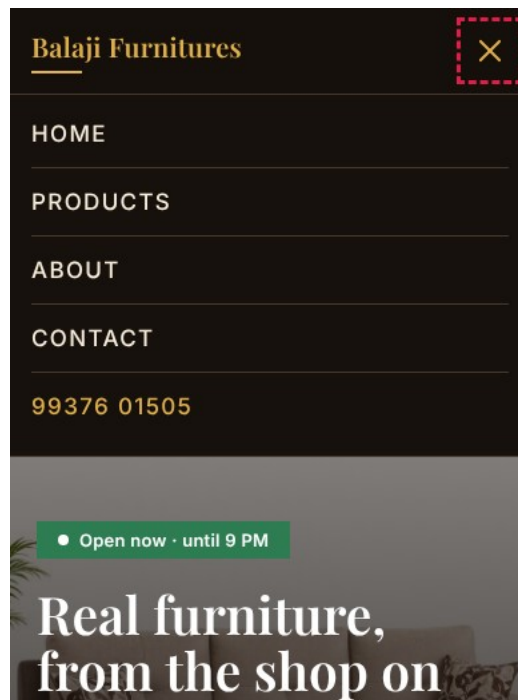

Red dashed box marks the animated element.

16. Hamburger → Cross Morph + Mobile Menu Drop

Technique: CSS transition + @keyframes: menu-drop, menu-link

Where used / what you see: Phone view menu button. Three bars morph into an X; the panel drops down and links slide in one by one.

Code location: style.css lines 489-490, 582-602; main.js lines 95-120

Red dashed box marks the animated element.

Note: all motion is switched off automatically for visitors who set "reduce motion" in their device (style.css line 645).
